

**UNIVERSITAT RAMON LLULL**

## From Science and Technology to Real-World Ventures

A unique program organized by Esade Business  
School and IQS in Barcelona

# Program description

Combining IQS scientific excellence with Esade entrepreneurial leadership, this program offers a unique learning experience that bridges deep-tech knowledge and real-world business creation.

Over two weeks, participants will immerse themselves in an academic and professional environment designed to transform their passion for science and technology into entrepreneurial action.

Join us in Barcelona for inspirational talks, interactive workshops, company visits, and a final pitch to experts and investors.

This summer program is targeted at university students and recent graduates from science or technology degrees from around the world with curiosity for innovation and a drive to make an impact.
